# Case study success story

Regional College of Further Education

The requirement

- A regional multi campus further education college wanted to rationalise its multitude of desktop printers and copiers and invest in new MFP devices for both departmental network and central reprographics output, while also introducing job ticketing and print job accounting software to improve operational efficiency and save cost.
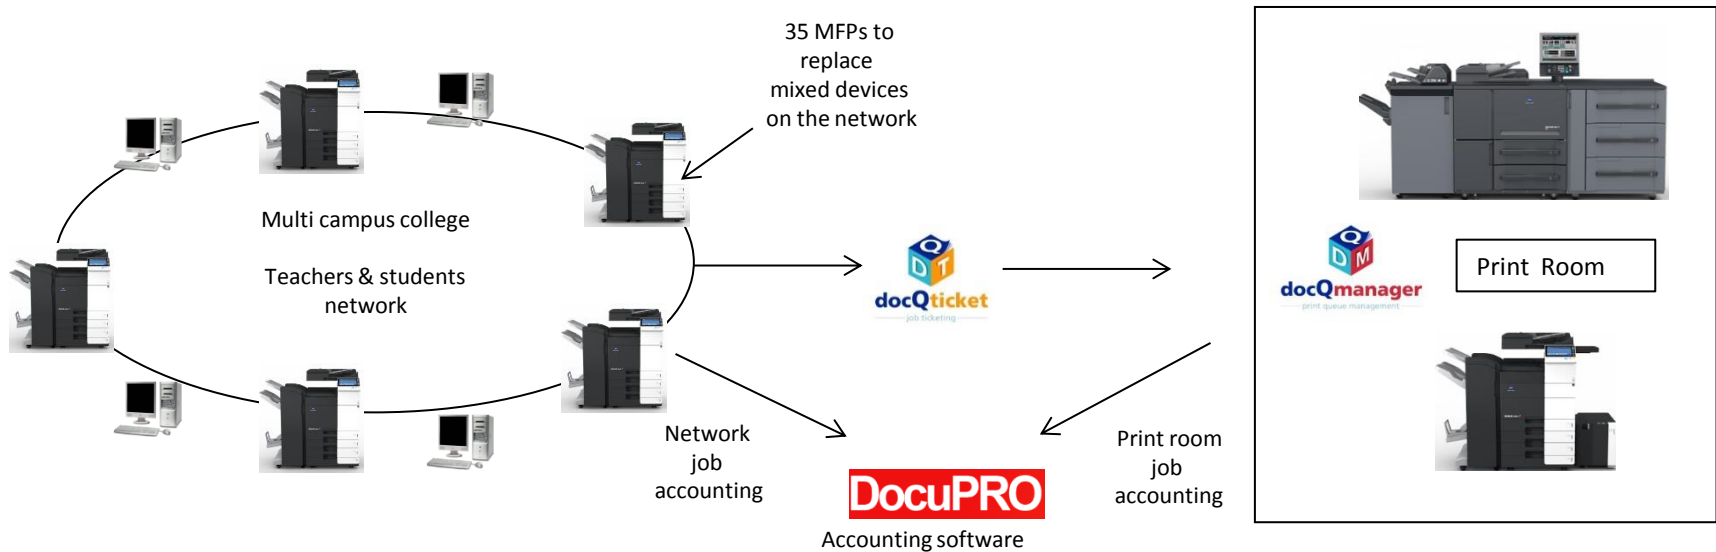

Miscellaneous mix of printers and copiers across the network

Multi campus college

Teachers & students network

No print cost accounting

Reprographics

Case study success story

Regional College of Further Education

The solution

- In addition to the investment in departmental MFPs with card readers and new high volume devices for the central reprographics print room, docQmanager was chosen for its simple to use but powerful features for job ticketed submission and print room management. Its unique integration with the chosen departmental cost recovery system provides seamless accounting into a common system wherever jobs are printed

35 MFPs to replace mixed devices on the network
